

Conical Bollard

Conical barrier post made of galvanised steel tubing with a tapered diameter of 133/90x3 mm. This series of barrier posts are fitted with a rounded steel top made of a single piece of flat steel with ring. The dimensions for the fixed bollard are 1250mm high overall. The dimensions for the removable bollard are 820mm high above finished floor level with a 430mm base socket below finished floor level and euro profile cylinder lock.

Usable in virtually any environment and for many purposes. We produce these barrier posts in large quantities, making the price particularly attractive. Unlike so many
