

Rondo Canopy Shelter

The FalcoRondo is a cantilevered design incorporating a 'barrel' vaulted roof section. A very flexible canopy system which can be arranged side by side or in a continuous run in the style of a walkway canopy.

The canopy is available as a 1.5m or 2.5m wide unit enabling a number of options for walkways and sheltered areas. The design has integral gutters for rainwater above ground level. The shelter has a clear polycarbonate roof canopy and is available with optional side panels for weather protection.
